LawNote: Legal and Case Management solution based on HANA platform. <http://earbitration.in/LawNote.aspx> and <http://scn.sap.com/community/hana-in-memory/use-cases/blog/2015/04/02/lawnote--executive-summary>

Background:

LawNote™ is the current solution built on SAP HANA® with Web Based user Interface (UI5) which addresses end to end process in life cycle of legal issues affecting businesses and board alike. Some of the features it entails are **risk analysis, text based analytics and wide search for documents spread across geographically and logistically**. The decision to opt for HANA comes precisely for this text analytics and to look at global spread of enterprise issues to be dealt by the Solution.

The three modules are pre-Litigation, Litigation and document. All the three modules have the connectivity with data retrieval from each other and logic flows.

The core thinking is to address wide spread information to be managed centrally through this application with multiple people interacting at different access levels. The interface of the external users shall facilitate the customization of legal document issues required at global scale today whether these are visa related, travel, family related, claims etc.

Additional Modules:

Estate related, compliance related, Stock market related.

Also available:

Cloud and on Premise.
